

Danilo Fonseca dos Santos

Full Stack Developer | PHP Wordpress & Laravel • JavaScript React & TypeScript

São Paulo, Brazil | On-site, Hybrid & Remote Work • Available for Relocation

Dynamic, communicative and quick-learning developer with over a decade of proven hands-on expertise. Proficient in crafting complex interfaces and functionalities. My main stack includes PHP & JavaScript with Wordpress, Laravel, Codelgniter, React and TypeScript, among others. Throughout my career, I've successfully spearheaded the engineering, development, maintenance, and management of numerous projects and solutions spanning systems, websites, CMS, portals, e-commerces, plugins, and various web-based applications for a diverse array of companies around the world. My collaborative and communicative approach within cross-functional teams, some domestic and some international, has facilitated seamless integrations, optimized layouts, and rich UI/UX interactions and experiences, always aiming technological efficacy. Moreover, I'm a experienced client infrastructure manager, ensuring streamlined development processes and robust client satisfaction.

EXPERIENCE
